

Give stones the HEAVE-HO with S/O

Urinary tract calculi can cause ongoing, life-threatening problem for cats and dogs and even though better nutrition has helped reduce their incidence, they are still a relatively common reason for veterinary consultation. ROYAL CANIN®'s range of Urinary diets provide nutritional management for pets with a range of urinary calculi, but how do you know which diet to choose?

To help make your choice of diet easier, ROYAL CANIN® is proud to launch Urine Stone Analysis as a service to veterinarians using our food for their patients.

To celebrate the launch of ROYAL CANIN® Urinary Stone Analysis in the UK and Ireland, we are offering a **FREE urine pH meter**, with buffer solution to the value of £70, to practices **ordering £500 of ROYAL CANIN® Urinary or S/O Index diets** between April and June 2016.

Get a free pH meter when you order £500 of ROYAL CANIN® Urinary or S/O Index diets!*

FELINE

Diet	Cost	Quantity
