## A PRECISE FORMULA TO HELP IN THE NUTRITIONAL MANAGEMENT OF ADULT SMALL DOGS WITH A NUTRIENT INTOLERANCE.

### PRODUCT BENEFITS:

Extensively hydrolysed protein, composed of oligopeptides and pure amino acids from a single source helps minimise the risk of nutrient intolerances. A manufacturing process aimed at minimising sources of contamination.

Formulated to support the skin's natural protective barrier for optimal skin health.

Specially adapted formula to meet the digestive and dental sensitivities of small dogs. The kibble is suitable for their small jaws.

### FORMULA FEATURES:

- Produced in facilities which include DNA-testing and systematic and thorough cleaning of the production lines.
- Highly digestible purified starch as the only carbohydrate source.

AVAILABLE IN	NVS	COVETRUS	MWI
1.5 kg	392182	RCVHN01	30543548
3 kg	392194	RCVHN02	30543559
