FELINE NUTRITIONAL MANAGEMENT DECISION TREE

This resource has been produced with the greatest care and incorporates the most up-to-date scientific information and research findings. We recommend that you refer to our packaging as the primary reference for product information as this can change with time. Bearing in mind the diversity and complexity of clinical cases in dogs and cats, it is important to note that the suggestions in this resource for further tests and therapeutic options cannot be exhaustive. Under no circumstances should the treatments and dietary solutions suggested here replace examination by a veterinary surgeon.

The publishers and the authors will accept no responsibility for the failure of any of the treatments or nutritional solutions put forward in this resource. Not for use in Canada and in USA.

While the information is considered to be true and correct at the date of publication (**March 2023**), changes in circumstances after the time of publication may impact on the accuracy of the information.

* Hydrolysis level for the major protein source

ANALLERGENIC

Available in
2 and 4kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

CAT'S WEIGHT (kg)	BODY CONDITION		
	THIN grams	NORMAL grams	OVERWEIGHT grams
2	39	32	26
2.5	45	38	30
3	52	43	34
3.5	58	48	38
4	63	53	42
4.5	69	57	46
5	74	62	49
5.5	79	66	53
6	84	70	56
6.5	89	75	60
7	94	79	63
7.5	99	83	66
8	104	86	69
8.5	108	90	72
9	113	94	75
9.5	117	98	78
10	121	101	81

When a food allergy or a food intolerance is suspected, the cat's diet should be changed following classical food transition. Nutritional management with Anallergenic may be continued for the cat's lifetime, under veterinary supervision.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Feline Atopic Dermatitis (FAD) associated with AFR
- Inflammatory Bowel Disease (IBD)

NOT RECOMMENDED IN CASE OF

- Growth, gestation/lactation

EXTENSIVELY HYDROLYSED PROTEIN

Extensively hydrolysed protein composed of oligopeptides and pure amino acids from single source helps minimise the risk of nutrient intolerances.

ALLERGEN RESTRICTION

A manufacturing process aimed at minimising sources of contamination.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

KEY VALUES	Per 1000Kcal	Per 100g as fed
Moisture	13.96g	5.5g
Protein	62.45g	24.6g
Crude Fat	43.16g	17g
Crude Fibre	8.12g	3.2g
Ash	19.04g	7.5g
NFE	107.39g	42.3g

Calcium	1.52g	0.6g
Phosphorus	1.22g	0.48g
Sodium	2.79g	1.1g
Magnesium	0.20g	0.08g

CALCULATED METABOLISABLE ENERGY (TOTAL)

Energy_NRC 2006 (CF) [kcal/100g] 393.9

COMPOSITION

Maize starch, feather hydrolysate with low molecular weight [source of L-amino acids and oligopeptides], copra oil, soya oil, vegetable fibres, minerals, animal fat, chicory pulp, fish oil, fructo-oligo-saccharides, maltodextrin, mono - and diglycerides of palmitic and stearic acids esterified with citric acid, dextrose, marigold meal. Protein source: feather hydrolysate with low molecular weight [26.2%]. Carbohydrate source: maize starch [35.9%]

ADDITIVES (KG)*

Nutritional additives: Vitamin A: 26000 IU, Vitamin D3: 800 IU, Iron [3b103]: 42mg, Iodine [3b201, 3b202]: 3.8mg, Copper [3b405, 3b406]: 15mg, Manganese [3b502, 3b504]: 54mg, Zinc [3b603, 3b605, 3b606]: 147mg, Selenium [3b801, 3b811, 3b812]: 0.37mg - Technological additives: Clinoptilolite of sedimentary origin: 9g - Preservatives - Antioxidants.

* Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

HYPOALLERGENIC

Available in
2.5 and 4.5kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

CAT'S WEIGHT (kg)	BODY CONDITION		
	THIN grams	NORMAL grams	OVERWEIGHT grams
2	37	31	25
2.5	44	36	29
3	50	41	33
3.5	55	46	37
4	61	51	41
4.5	66	55	44
5	71	60	48
5.5	76	64	51
6	81	68	54

8	100	83	67
8.5	104	87	69
9	109	91	72
9.5	113	94	75
10	117	98	78

When a food allergy or a food intolerance is suspected, the cat's diet should be changed following classical food transition. Nutritional management with Hypoallergenic may be continued for the cat's lifetime, under veterinary supervision.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Feline Atopic Dermatitis (FAD) associated with AFR
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Growth, gestation/lactation

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

EPA/DHA & SKIN BARRIER

Formulated with fatty acids to help maintain healthy skin and digestion. Formulated to support the skin's natural protective barrier.

DIGESTIVE HEALTH

Helps regulate intestinal transit and supports a balanced digestive flora.

KEY VALUES	Per 1000Kcal	Per 100g as fed
Moisture	13.46g	5.5g
Protein	62.39g	25.5g
Crude Fat	48.94g	20g

When a food allergy or a food intolerance is suspected, the cat's diet should be changed following classical food transition. Nutritional management with Sensitivity Control may be continued for the cat's lifetime, under veterinary supervision.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - long term management
- Chronic diarrhoea

NOT RECOMMENDED IN CASE OF

- Growth, gestation/lactation

SELECTED PROTEIN

A limited number of protein sources helps limit the risk of nutrient intolerance.

EPA/DHA & SKIN BARRIER

Formulated with fatty acids to help maintain healthy skin and digestion. Formulated to support the skin's natural protective barrier.

DIGESTIVE SECURITY

Formulated with nutrients which support a balanced digestive system.

KEY VALUES	Per 1000Kcal	Per 100g as fed
Moisture	15.76g	5.5g
Protein	77.39g	27g
Crude Fat	31.53g	11g

9	116	96	77	
9.5	120	100	80	
10	125	104	83	

As soon as the first signs of the disease appear, Skin & Coat should be fed for a 2 month-period, to obtain visible results, even though improvement may be noticed as early as 2 weeks after switching diet. The cat's diet should be changed following classical food transition. Nutritional management with Skin & Coat may continue until the cat is 7 years old, under veterinary supervision.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

DERMATOSIS AND HAIR LOSS

RECOMMENDED FOR YOUNG* AND ADULT NEUTERED CATS WITH SENSITIVE SKIN, UP TO 7 YEARS OF AGE

- Feline Atopic Dermatitis
 - Skin and coat support in case of other dermatitis** such as:
 - Flea Allergic Dermatitis
 - Skin infections or external parasites
- *Post neutering (over 6 months of age)
**In association with medical treatment (such as antiparasitic or antibiotic medications) if needed

SKIN BARRIER
Formulated to support the skin's natural protective barrier for optimal skin health.

SKIN & COAT
Contains specific key nutrients, including EPA and DHA, to help support healthy skin and a shiny coat in cats with sensitive skin.

LEAN BODY MASS
A high protein diet helps maintain muscle mass.

KEY VALUES	Per 1000Kcal	Per 100g as fed
Moisture	14.33g	5.5g
Protein	93.82g	36g
Crude Fat	36.49g	14g

Renal diets are recommended for cats in the advanced stages of CKD (IRIS stage 2-4). When a food allergy or a food intolerance is suspected, the cat's diet should be changed following classical food transition. Initially feed the diet for 3-8 weeks and re-evaluate based on clinical assessment of the response. Feline Renal + Hypoallergenic can be continued for the cat's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals. Fresh water should be available at all times.

RECOMMENDED FOR CASES OF

Renal disease • Azotaemic Chronic Kidney Disease (IRIS stage 2 to 4) + Dermatological/GI conditions: Food elimination trial • Food allergies • Food intolerance • Inflammatory Bowel Disease (IBD) • Chronic diarrhoea • Feline Atopic Dermatitis (FAD) associated with AFR • Exocrine Pancreatic Insufficiency (EPI) • Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

• Pregnancy, lactation, growth

RENAL SUPPORT

Formulated with low phosphorus and moderate protein of high quality to support renal function.

ADAPTED ENERGY

Adapted energy content to reduce meal volume and help support a reduced appetite.

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

9	118	1+2/8	98	1	78	6/8	
10	127	1+2/8	106	1+1/8	85	7/8	

For nutritional management of cats with struvite urolithiasis and Adverse Food Reaction: feed the diet for 5-12 weeks and re-evaluate based on clinical assessment of the response. To avoid recurrence of struvite uroliths, the diet should be fed for a further 6 months minimum followed by urinalysis. S/O-AFR Feline can be maintained for the cat's lifetime. It is recommended to divide the daily intake into 2 meals.

[S/O] INDEX

This diet is formulated to promote a healthy urinary environment.

RECOMMENDED FOR CASES OF

Feline lower urinary tract disease: • Dissolution of struvite uroliths • Management of recurrent struvite and calcium oxalate urolithiasis. In older cats, renal function should be checked before S/O-AFR Feline is recommended.

+ Dermatological/GI conditions: Food elimination trial • Food allergies • Food intolerance • Inflammatory Bowel Disease (IBD) • Chronic diarrhoea • Exocrine Pancreatic Insufficiency (EPI) • Small Intestinal Bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

• Pregnancy, lactation, growth • Chronic Kidney Disease • Heart disease (where sodium restriction is required) • Concurrent use of urine-acidifying drugs

URINE DILUTION

Diluting urine decreases the urinary concentration of struvite and calcium oxalate crystals. Greater urinary volumes also ensure regular bladder wash out.

LOW RSS

Low RSS (Relative Super-saturation) diets encourage an undersaturated urinary environment, unfavourable to the development of struvite and calcium oxalate crystals.

HYDROLYSED PROTEIN

Hydrolysed soya protein isolate with a low molecular weight for very low allergenicity.

SKIN BARRIER

A specially formulated complex of nutrients to support the skin's natural protective barrier role and for optimal skin health.

KEY VALUES

CANINE NUTRITIONAL MANAGEMENT DECISION TREE

* Hydrolysis level for the major protein source

ANALLERGENIC

SMALL DOGS

Available in 1.5 and 3kg bags

NUTRIENT INTOLERANCE

RECOMMENDED FOR ADULT SMALL BREED DOGS (≤10KG) FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Inflammatory Bowel Disease (IBD)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Growth, gestation/lactation

ALLERGEN RESTRICTION & OLIGOPEPTIDES

Extensively hydrolysed protein, composed of oligopeptides and pure amino acids from a single source helps minimise the risk of nutrient intolerances. A manufacturing process aimed at minimising sources of contamination.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

SPECIFICALLY FORMULATED FOR SMALL DOGS

Specially adapted formula to meet the digestive and dental sensitivities of small dogs. The kibble is suitable for their small jaws.

KEY VALUES	Per 1000Kcal	Per 100g as fed

CALCULATED METABOLISABLE ENERGY (TOTAL)

Energy_NRC 2006 (CF) (kcal/100g)	385.1
----------------------------------	-------

COMPOSITION

Maize starch, feather hydrolysate with low molecular weight (source of L-amino acids and oligopeptides), copra oil, minerals, soya oil, vegetable fibres, fructo-oligo-saccharides, chicory pulp, mono- and diglycerides of palmitic and stearic acids esterified with citric acid, fish oil, animal fat, marigold meal. Protein source: feather hydrolysate with low molecular weight (22.3%). Carbohydrate source: maize starch (46%).

ADDITIVES (KG)*

Nutritional additives: Vitamin A 30000 IU, Vitamin D3 1000 IU, Iron [3b103] 40mg, Iodine [3b201, 3b202] 3.3mg, Copper [3b405, 3b406] 15mg, Manganese [3b502, 3b504] 53mg, Zinc [3b603, 3b605, 3b606] 144mg, Selenium [3b801, 3b811, 3b812] 0.33mg - Antioxidants.

* Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

ANALLERGENIC

Available in 3 and 8kg bags

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Inflammatory Bowel Disease (IBD)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Growth, gestation/lactation

EXTENSIVELY HYDROLYSED PROTEIN

Extensively hydrolysed protein composed of oligopeptides and pure amino acids from single source helps minimise the risk of nutrient intolerances.

ALLERGEN RESTRICTION

A manufacturing process aimed at minimising sources of contamination.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

When a food allergy or a food intolerance is suspected, the dog's diet should be changed following classical food transition. Nutritional management with Hypoallergenic Moderate Calorie may be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals.

NUTRIENT INTOLERANCE

RECOMMENDED FOR DOGS WITH TENDENCY TO BE OVERWEIGHT IN CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Acute pancreatitis* **may be fed in case of chronic pancreatitis*
- Gestation/lactation/growth

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

MODERATE CALORIE AND PHOSPHORUS

Moderate calorie content to help maintain ideal weight and moderate phosphorus intake to help support healthy kidney function.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

KEY VALUES Per 1000Kcal Per 100g as fed

12 - 13	-	-	223	305-304	383-380
14 - 15	-	-	-	303	376

When a food allergy or a food intolerance is suspected, the puppy's diet should be changed following classical transition. Nutritional management with Hypoallergenic Puppy can be continued until the end of the growth period, under veterinary supervision. It is recommended to divide the daily intake into several meals.

NUTRIENT INTOLERANCE

RECOMMENDED FOR PUPPIES OVER 6 MONTHS OF AGE, WITH AN EXPECTED ADULT WEIGHT GREATER THAN 4KG IN CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ management during growth
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Gestation and lactation
- Puppies less than 6 months of age
- Puppies with an expected adult weight <4kg

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

OPTIMAL GROWTH

Specially adapted levels of nutrients (including protein and calcium) to meet the nutritional needs of growing puppies and satisfy their fussy appetites.

KEY VALUES Per 1000Kcal Per 100g as fed

HYPOALLERGENIC

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Gestation/lactation

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

EPA/DHA & SKIN BARRIER

Formulated with fatty acids to help maintain healthy skin and digestion. Formulated to support the skin's natural protective barrier.

DIGESTIVE HEALTH

Helps regulate intestinal transit and supports a balanced digestive flora.

Available in
2, 7 and
14kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

When a food allergy or a food intolerance is suspected, the dog's diet should be changed following classical food transition. Nutritional management with Hypoallergenic may be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals.

COMPOSITION

Rice flour, hydrolysed soya protein isolate, animal fats, rice, hydrolysed poultry liver, beet pulp, minerals, soya oil, fructo-oligo-saccharides, fish oil, borage oil, marigold meal. Protein sources: hydrolysed soya protein isolate (17.6%), hydrolysed poultry liver (5.0%). Carbohydrate sources: rice (48.1%).

ADDITIVES (KG)*

Nutritional additives: Vitamin A: 32500 IU, Vitamin D3: 800 IU, Iron (3b103): 40mg, Iodine (3b201, 3b202): 3.6mg, Copper (3b405, 3b406): 15mg, Manganese (3b502, 3b504): 52mg, Zinc (3b603, 3b605, 3b606): 154mg, Selenium (3b801, 3b811, 3b812): 0.25mg - Technological additives: Clinoptilolite of sedimentary origin: 10g - Preservatives - Antioxidants.

* Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

HYPOALLERGENIC

SMALL DOGS

Available in
3.5kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

ADULT DOG	DOG'S WEIGHT (kg)	BODY CONDITION		
		THIN	NORMAL	OVERWEIGHT
		grams	grams	grams
	2	54	48	41

	9	167	147	127
	10	181	159	137

When a food allergy or a food intolerance is suspected, the dog's diet should be changed following classical food transition. Nutritional management with Hypoallergenic Small Dogs may be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

NUTRIENT INTOLERANCE

RECOMMENDED FOR ADULT SMALL BREED DOGS (< 10KG) IN CASE OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Gestation/lactation/growth

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

SPECIFICALLY FORMULATED FOR SMALL DOGS

Specially adapted formula to meet the digestive, dental and urinary sensitivities of small dogs. The kibble is suitable for their small jaws.

SKIN CARE

Available in 2 and 11kg bags

DERMATOSIS AND HAIR LOSS

RECOMMENDED FOR CASES OF

- Canine Atopic Dermatitis (skin lesions and otitis externa)
- Skin and coat support in case of other dermatitis* such as:
 - Flea Allergic Dermatitis
 - Pyodermatitis

NOT RECOMMENDED IN CASE OF * in association with antiparasitic/antibiotic treatment

- Growth, gestation/lactation

- DERMAL CARE**
Helps in the nutritional management of dogs with sensitive skin.
- SKIN BARRIER**
Formulated to support the skin's natural protective barrier for optimal skin health.
- DIGESTIVE TOLERANCE**
Contains nutrients which support a balanced intestinal flora and digestive transit.

CALCULATED METABOLISABLE ENERGY (TOTAL)
Energy_NRC 2006 (CF) (kcal/100g) 389.6

COMPOSITION
Maize, wheat gluten**, rice, manioc (tapioca), animal fats, maize gluten, hydrolysed animal proteins, minerals, beet pulp, soya oil, fish oil, vegetable fibres, linseed, mono- and diglycerides of palmitic and stearic acids esterified with citric acid, fructo-oligo-saccharides, borage oil, marigold meal.

**L.I.P.: protein selected for its very high digestibility

ADDITIVES (KG)***
Nutritional additives: Vitamin A: 29000 IU, Vitamin D3: 800 IU, Iron [3b103]: 45 mg, Iodine [3b201, 3b202]: 4.5mg, Copper [3b405, 3b406]: 14mg, Manganese [3b502, 3b504]: 59mg, Zinc [3b603, 3b605, 3b606]: 151mg, Selenium [3b801, 3b811, 3b812]: 0.1mg - Technological additives: Clinoptilolite of sedimentary origin: 5g - Preservatives - Antioxidants.

*** Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

RECOMMENDED DAILY INTAKE & FEEDING DURATION

ADULT DOG	DOG'S WEIGHT (kg)	BODY CONDITION		
		THIN grams	NORMAL grams	OVERWEIGHT grams
	2	54	47	41
	4	91	80	69
	6	123	108	93
	8	153	134	116
	10	180	159	137
	15	245	215	186
	20	303	267	231
	25	359	316	273
	30	411	362	313
	35	462	406	351
	40	510	449	388
	45	557	491	424
	50	603	531	458
	55	648	570	492
	60	692	609	526
	70	776	683	590
	80	858	755	652

As soon as the first signs of skin disease appear, the diet should be recommended for a 2-month period, following classical food transition, to obtain visible results. Nutritional management with Skin Care may be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals.

DERMATOSIS AND HAIR LOSS

RECOMMENDED FOR ADULT SMALL BREED DOGS (ADULT WEIGHT <10KG) IN CASES OF

- Canine Atopic Dermatitis (skin lesions and otitis externa)
- Skin and coat support in case of other dermatitis* such as:
 - Flea Allergic Dermatitis
 - Pyodermatitis

NOT RECOMMENDED IN CASE OF * in association with antiparasitic/antibiotic treatment

- Growth, gestation/lactation

- DERMAL CARE**
Helps in the nutritional management of dogs with sensitive skin.
- SKIN BARRIER**
Formulated to support the skin's natural protective barrier for optimal skin health.
- SPECIFICALLY FORMULATED FOR SMALL DOGS**
Specially adapted to meet the specific digestive, dental and urinary sensitivities of small dogs. The kibble is suitable for their small jaws.

As soon as the first signs of skin disease appear, the diet should be recommended for a 2-month period, following classical food transition, to obtain visible results. Nutritional management with Skin Care Small Dogs may be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

MULTIFUNCTION RENAL HYPOALLERGENIC

Available in 4 and 10kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

DOG'S WEIGHT (kg)	BODY CONDITION		
	THIN grams	NORMAL grams	OVERWEIGHT grams
2	52	46	40
4	88	77	67
6	119	105	90
8	148	130	112
10	174	153	133
15	236	208	180
20	293	258	223
25	347	305	263
30	398	350	302
35	446	393	339
40	493	434	375
50	583	513	443
60	669	588	508
70	750	660	570
80	829	730	630

Renal diets are recommended for dogs in the advanced stages of CKD (IRIS stage 2-4). When a food allergy or a food intolerance is suspected, the dog's diet should be changed following classical food transition. Initially feed the diet for 3-8 weeks and re-evaluate requirement for the hypoallergenic diet component based on clinical assessment of the response. Canine Renal + Hypoallergenic can be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals. Fresh water should be available at all times.

RECOMMENDED FOR CASES OF

Renal Disease: • Azotaemic Chronic Kidney Disease (CKD) (IRIS stage 2 to stage 4) • Chronic Kidney Disease with proteinuria (IRIS stage 1 to 4) +
Dermatological / GI conditions: Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs: • Food elimination trial • Long term management • Exocrine Pancreatic Insufficiency (EPI) • Inflammatory Bowel Disease (IBD) • Chronic diarrhoea • Small intestinal bacterial overgrowth (SIBO) • Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritis

NOT RECOMMENDED IN CASE OF

• Growth, lactation/gestation • Pancreatitis

RENAL SUPPORT

Formulated with low phosphorus and moderate protein of high quality to support renal function.

ADAPTED ENERGY

Adapted energy content to reduce meal volume and help support a reduced appetite.

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

80	792	8+7/8	684	7+6/8	654	7+6/8

For nutritional management of dogs with struvite urolithiasis and Adverse Food Reaction: feed the diet for 5-12 weeks and re-evaluate based on clinical assessment of the response. If a urinary tract infection is present S/O-AFR Canine, combined with an antibacterial agent, should be fed for at least one month after a negative urine culture result has been obtained. It is recommended to divide the daily intake into 2 meals.

This diet is formulated to promote a healthy urinary environment.

RECOMMENDED FOR CASES OF

Urinary disorders: • Dissolution of struvite uroliths • Recurrent struvite and calcium oxalate urolithiasis • Bacterial cystitis. In older dogs, renal function should be checked before S/O-AFR Canine is recommended.
Dermatological/GI conditions: Food elimination trial • Food allergies • Food intolerance • Food responsive Inflammatory Bowel Disease (IBD) • Chronic diarrhoea • Small Intestinal Bacterial Overgrowth (SIBO) • Exocrine Pancreatic Insufficiency (EPI)

NOT RECOMMENDED IN CASE OF

Pregnancy, lactation, growth • Chronic Kidney Disease • Heart disease (where sodium restriction is required) • Concurrent use of urine-acidifying drugs

URINE DILUTION

Diluting urine decreases the urinary concentrations of struvite and calcium oxalate crystals. Greater urinary volumes also ensure regular bladder wash-out.

LOW RSS

Low RSS (Relative Super-saturation) diets encourage an undersaturated urinary environment, unfavourable to the development of struvite and calcium oxalate crystals.

HYDROLYSED PROTEIN

A specially formulated complex of nutrients to support the skin's natural protective barrier role and for optimal skin health.

SKIN BARRIER

A specially formulated complex of nutrients to support the skin's natural protective barrier role and for optimal skin health.
