COMPATIBLE WITH
HYPOALLERGENIC DIETS

This resource has been produced with the greatest care and incorporates the most up-to-date scientific information and research findings. We recommend that you refer to our packaging as the primary reference for product information as this can change with time. Bearing in mind the diversity and complexity of clinical cases in dogs and cats, it is important to note that the suggestions in this resource for further tests and therapeutic options cannot be exhaustive. Under no circumstances should the treatments and dietary solutions suggested here replace examination by a veterinary surgeon.

The publishers and the authors will accept no responsibility for the failure of any of the treatments or nutritional solutions put forward in this resource. Not for use in Canada and in USA.

While the information is considered to be true and correct at the date of publication (May 2025), changes in circumstances after the time of publication may impact on the accuracy of the information. Please refer to the digital copy available online at vetportal.royalcanin.co.uk for the most recent product data.

RECOMMENDED DAILY INTAKE & FEEDING DURATION

When a food allergy or a food intolerance is suspected, the cat's diet should be changed following classical food transition. Nutritional management with Anallergenic may be continued for the cat's lifetime, under veterinary supervision.

[S/O INDEX] *This diet is formulated to promote a healthy urinary environment.*

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial ■ long term management
- Feline Atopic Dermatitis (FAD) associated with AFR
- Inflammatory Bowel Disease (IBD)

NOT RECOMMENDED IN CASE OF

- Growth, gestation/lactation

EXTENSIVELY HYDROLYSED PROTEIN

Extensively hydrolysed protein composed of oligopeptides and pure amino acids from single source helps minimise the risk of nutrient intolerances.

ALLERGEN RESTRICTION

ALLERGEN RESTRICTION
A manufacturing process aimed at minimizing sources of contamination.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

KEY VALUES

Energy_NRC 2006 (CF) (kcal/100g)	393.9
----------------------------------	-------

COMPOSITION

Maize starch, feather hydrolysate with low molecular weight [source of L-amino acids and oligopeptides], copra oil, soy oil, vegetable fibres, minerals, animal fat, chicory pulp, fish oil, fructo-oligosaccharides, maltodextrin, mono- and diglycerides of palmitic and stearic acids esterified with citric acid, dextrose, marigold meal. Protein source: feather hydrolysate with low molecular weight [26.2%]. Carbohydrate source: maize starch [35.9%]

ADDITIVES (KG)*

Nutritional additives: Vitamin A: 26000 IU, Vitamin D3: 800 IU, Iron [3b103]: 42mg, Iodine [3b201, 3b202]: 3.8mg, Copper [3b405, 3b406]: 15mg, Manganese [3b502, 3b504]: 54mg, Zinc [3b603, 3b605, 3b606]: 147mg, Selenium [3b801, 3b811, 3b812]: 0.37mg - Technological additives: Cinnophtolite of sedimentary origin: 9g - Preservatives - Antioxidants.

* Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

HYPOALLERGENIC

Available in
2.5 and 4.5kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

	CAT'S WEIGHT (kg)	BODY CONDITION		
		THIN	NORMAL	OVERWEIGHT
		grams	grams	grams
ADULT CAT	2	37	31	25

	9.5	113	94	75
	10	117	98	78

When a food allergy or a food intolerance is suspected, the cat's diet should be changed following classical food transition. Nutritional management with Hypoallergenic may be continued for the cat's lifetime, under veterinary supervision.

[S/O INDEX]

This diet is formulated to promote a healthy urinary environment.

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial
 - long term management
- Feline Atopic Dermatitis (FAD) associated with AFR
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Growth, gestation/lactation

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

EPA/DHA & SKIN BARRIER

Formulated with fatty acids to help maintain healthy skin and digestion. Formulated to support the skin's natural protective barrier.

DIGESTIVE HEALTH

Helps regulate intestinal transit and supports a balanced digestive flora.

KEY VALUES	Per 1000Kcal	Per 100g as fed

	9.5	120	100	80
	10	125	104	83

As soon as the first signs of the disease appear, Skin & Coat should be fed for a 2 month-period, to obtain visible results, even though improvement may be noticed as early as 2 weeks after switching diet. The cat's diet should be changed following classical food transition. Nutritional management with Skin & Coat may continue until the cat is 7 years old, under veterinary supervision.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

DERMATOSIS AND HAIR LOSS

RECOMMENDED FOR YOUNG* AND ADULT NEUTERED CATS WITH SENSITIVE SKIN, UP TO 7 YEARS OF AGE

- Feline Atopic Dermatitis
- Skin and coat support in case of other dermatitis** such as:
 - Flea Allergic Dermatitis
 - Skin infections or external parasites

*Post neutering (over 6 months of age)

**In association with medical treatment

(such as antiparasitic or antibiotic medications) if needed

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

SKIN & COAT

Contains specific key nutrients, including EPA and DHA, to help support healthy skin and a shiny coat in cats with sensitive skin.

LEAN BODY MASS

A high protein diet helps maintain muscle mass.

KEY VALUES	Per 1000Kcal	Per 100g as fed

	9.5	112	94	75
	10	117	97	78

ROYAL CANIN® RENAL + HYPOALLERGENIC dry is a complete dietetic feed for cats formulated for the support of renal function in the case of chronic renal insufficiency and for the reduction of ingredient and nutrient intolerances. Restricted level of phosphorus. Hydrolysed protein sources and selected carbohydrate sources.

Renal diets are recommended as soon as creatinine goes out of reference range (from IRIS stage 2), before the disease further progresses, and before inappetence develops. When a food allergy or a food intolerance is suspected, the cat's diet should be changed following classical transition. RENAL + HYPOALLERGENIC diet may be continued for the cat's lifetime. Some mineral disturbances (eg. hypokalaemia) may require additional treatment. It is recommended that a veterinarian's opinion be sought before use and before extending the period of use.

It is recommended to divide the daily intake into several meals. Fresh water should be available at all times.

RECOMMENDED FOR CASES OF

- Renal disease
 - Azotaemic Chronic Kidney Disease (IRIS stages 2 to 4)
 - Chronic Kidney Disease with proteinuria (IRIS stages 1 to 4)

Dermatological/GI conditions:

- Adverse Food Reactions (AFR)
- Atopic dermatitis
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)

Other:

- Management of calcium oxalate urolith recurrence in cats with impaired renal function
- Management of recurrence of urolithiasis requiring urine alkalinisation: urate & cystine uroliths

NOT RECOMMENDED FOR CASES OF

- Growth, gestation/lactation

RENAL SUPPORT

Formulated with low phosphorus and moderate protein of high quality to support renal function.

ADAPTED ENERGY

Adapted energy content to reduce meal volume and help compensate for a decreased appetite.

HYDROLYSED PROTEIN

Hydrolysed protein with low molecular weight to ensure the food is hypoallergenic.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

KEY VALUES

	Per 1000Kcal	Per 100g as fed
Moisture	13.41 g	5.5 g
Protein	63.38 g	26 g
Fat content	48.76 g	20 g
Crude Fibre	10 g	4.1 g
Ash	13.9 g	5.7 g
Carbohydrate (NFE)	94.34 g	38.7 g
Dietary Fibre	23.16 g	9.5 g
Omega-6	12.8 g	5.25 g
Omega-3	2.61 g	1.07 g
EPA + DHA	1 g	0.41 g
Calcium	1.46 g	0.6 g
Phosphorus	1 g	0.41 g
Sodium	0.85 g	0.35 g
Chloride	1.95 g	0.8 g
Potassium	2.19 g	0.9 g
Magnesium	0.12 g	0.05 g
Zinc	41.44 mg	17 mg
Vitamin D	195.03	80 IU
Vitamin A	9019.99	3700 IU

Metabolisable energy* 410.2 Kcal

*Calculated according to NRC 2006 CF. Essential Fatty Acids: Linoleic Acid (5.06%), Arachidonic Acid (0.07%).

COMPOSITION

Rice flour, hydrolysed soya protein isolate, animal fats, rice, chicory pulp, hydrolysed poultry liver, vegetable fibres, minerals, soya oil, fish oil, fructo-oligosaccharides, borage oil, marigold meal.

Carbohydrate sources: rice flour (32.0%), rice (7.7%). Protein sources: hydrolysed soya protein isolate (23.2%), hydrolysed poultry liver (4.4%).

ADDITIVES (KG)**

Nutritional additives: Vitamin A: 31000 IU, Vitamin D3: 800 IU, Iron [3b103]: 39 mg, Iodine [3b201, 3b202]: 3.5 mg, Copper [3b405, 3b406]: 15 mg, Manganese [3b502, 3b504]: 52 mg, Zinc [3b603, 3b605, 3b606]: 152 mg, Selenium [3b801, 3b811, 3b812]: 0.25 mg - Technological additives: Clinoptilolite of sedimentary origin: 5 g - Antioxidants.

** Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

URINARY S/O + HYPOALLERGENIC

Available in 2 kg bags

	9.5	122	102	81
	10	127	106	84

ROYAL CANIN® URINARY S/O + HYPOALLERGENIC dry is a complete dietetic feed for cats formulated for the dissolution of struvite stones, the reduction of struvite stone recurrence, and for the reduction of ingredient and nutrient intolerances. Urine undersaturating or metastabilising properties for struvite and/or Urine acidifying properties. Hydrolysed protein sources and selected carbohydrate sources.

RECOMMENDATIONS: It is recommended that advice from a veterinarian be sought before use and before extending the period of use. Feed URINARY S/O + HYPOALLERGENIC dry for 5 to 12 weeks for the dissolution of struvite stones, initially up to 6 months for the reduction of struvite stone recurrence, and 3 to 8 weeks for the reduction of ingredient and nutrient intolerances: if signs of intolerance disappear this feed can be used initially up to one year.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

RECOMMENDED FOR CASES OF

Urinary disorders:

- Struvite uroliths: dissolution and management of recurrence
- Calcium oxalate uroliths: management of recurrence

+

Dermatological/GI conditions:

- Adverse Food Reactions (AFR)
- Feline Atopic Skin Syndrome (FASS)
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)

NOT RECOMMENDED FOR CASES OF

- Chronic Kidney Disease (CKD)
- Concurrent use of urine-acidifying medications
- Growth, gestation/lactation
- Cardiac disease (when sodium restriction is required) / Heart failure

URINE DILUTION

Urine dilution makes the urine less liable to form crystals.

LOW RSS

A low concentration of ions helps the dissolution and limits the formation of common urinary stones.

HYDROLYSED PROTEIN

Hydrolysed protein with low molecular weight to ensure the food is hypoallergenic.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

KEY VALUES

	Per 1000Kcal	Per 100g as fed
Moisture	14.58 g	5.5 g
Protein	71.58 g	27 g
Fat content	42.42 g	16 g
Crude Fibre	14.32 g	5.4 g
Ash	22.8 g	8.6 g

	9.5	114	95	76
	10	118	99	79

ROYAL CANIN® GASTROINTESTINAL HYDROLYSED PROTEIN dry is a complete dietetic feed for cats, formulated for the compensation for maldigestion and the reduction of ingredient and nutrient intolerances. A highly digestible feed with hydrolysed protein sources and selected carbohydrate sources.

RECOMMENDATIONS: It is recommended that a veterinarian's opinion be sought before use and before extending the period of use.

Feed GASTROINTESTINAL HYDROLYSED PROTEIN dry initially up to 12 weeks for compensation of maldigestion and lifetime in the case of chronic pancreatic insufficiency, and 3 to 8 weeks for reduction of ingredient and nutrient intolerances (initially up to one year if signs of intolerance disappear).

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

RECOMMENDED FOR CASES OF

- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Adverse Food Reactions (AFR) with gastrointestinal and/or dermatological signs
- AFR - food elimination trial
- Acute and chronic diarrhoea
- Maldigestion/ Malabsorption
- Dysorexia, re-feeding after surgery
- Acute hepatopathy/hepatic lipidosis without hepatic encephalopathy

NOT RECOMMENDED FOR CASES OF

- Lymphangiectasia, exudative enteropathy¹
- Hyperlipidaemia¹
- Growth, gestation/lactation
- Acute hepatopathy/hepatic lipidosis with hepatic encephalopathy²

¹ In these cases the recommended diet is Gastrointestinal Moderate Calorie.

² In these cases the recommended diet is Hepatic.

HYDROLYSED PROTEIN

Highly digestible hydrolysed (soy) protein, reducing the risk of food sensitivities that may cause recurrent gastrointestinal signs.

HIGH ENERGY

A high energy content to reduce meal volume and decrease intestinal load.

DIGESTIVE SUPPORT

A highly digestible formula with balanced fibres, including prebiotics, to support healthy digestion and transit.

KEY VALUES

	Per 1000Kcal	Per 100g as fed
Moisture	13.62 g	5.5 g
Protein	76.79 g	31 g
Fat content	49.54 g	20 g
Crude Fibre	11.64 g	4.7 g
Ash	18.83 g	7.6 g
Carbohydrate (NFE)	77.29 g	31.2 g
Dietary Fibre	26.01 g	10.5 g
Omega-6	10.03 g	4.05 g

EPA + DHA	0.99 g	0.4 g
Calcium	1.73 g	0.7 g
Phosphorus	1.49 g	0.6 g
Potassium	2.48 g	1 g
Sodium	1.61 g	0.65 g
Chloride	2.72 g	1.1 g
Magnesium	0.12 g	0.05 g
Copper	5.2 mg	2.1 mg
Zinc	44.34 mg	17.9 mg
Metabolisable energy*		403.7 Kcal

*Calculated according to NRC 2006 CF.

Essential fatty acids (Linoleic acid: 3.9%, Arachidonic acid: 0.07%).

COMPOSITION

Hydrolysed soya protein isolate**, rice flour**, animal fats**, vegetable fibres, rice**, hydrolysed poultry protein**, minerals, beet pulp, fish oil**, fructo-oligosaccharides (0.54%), psyllium husks and seeds, yeasts [source of manno-oligosaccharides] (0.19%), marigold meal.

** Highly digestible ingredients (74.3%). Protein sources (31.1%): hydrolysed soya protein isolate, hydrolysed poultry protein. Carbohydrate sources (27.5%): rice.

ADDITIVES (KG)**

Nutritional additives: Vitamin A: 35688 IU, Vitamin D3: 795 IU, Vitamin E: 673 mg, Vitamin C: 200 mg, Taurine: 2.5 g, Iron (3b103): 41 mg, Iodine (3b201, 3b202): 3.6 mg, Copper (3b405, 3b406): 15 mg, Manganese (3b502, 3b504): 53 mg, Zinc (3b603, 3b605, 3b606): 157 mg, Selenium (3b801, 3b811, 3b812): 0.25 mg - Technological additives: Clinoptilolite of sedimentary origin: 10 g - Antioxidants.

*** Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

A black and white photograph of a long-haired dog, possibly a Weimaraner, lying down with its head resting on the ground. The dog's fur is long and wavy, and its head is turned slightly to the right. The background is plain white.

ANALLERGENIC

ANALLERGENIC

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial
 - long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Inflammatory Bowel Disease (IBD)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Growth, gestation/lactation

EXTENSIVELY HYDROLYSED PROTEIN

Extensively hydrolysed protein composed of oligopeptides and pure amino acids from single source helps minimise the risk of nutrient intolerances.

ALLERGEN RESTRICTION

A manufacturing process aimed at minimising sources of contamination.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

KEY VALUES	Per 1000Kcal	Per 100g as fed
Moisture	21.70g	8.5g

Magnesium	0.23g	0.09g

CALCULATED METABOLISABLE ENERGY (TOTAL)
Energy_NRC 2006 (CF) [kcal/100g]
391.7

COMPOSITION

Maize starch, feather hydrolysate with low molecular weight (source of L-amino acids and oligopeptides), copra oil, soya oil, minerals, vegetable fibres, chicory pulp, fructo-oligosaccharides, fish oil, mono- and diglycerides of palmitic and stearic acids esterified with citric acid, animal fat, marigold meal. Protein source: feather hydrolysate with low molecular weight (19.78%). Carbohydrate source: maize starch (46.3%).

ADDITIVES (KG)*

Nutritional additives: Vitamin A: 38500 IU, Vitamin D3: 800 IU, Iron [3b103]: 41mg, Iodine [3b201, 3b202]: 3.5mg, Copper [3b405, 3b406]: 15 mg, Manganese [3b502, 3b504]: 55mg, Zinc [3b603, 3b605, 3b606]: 149mg, Selenium [3b801, 3b811, 3b812]: 0.34mg - Technological additives: Clinoptilolite of sedimentary origin: 9.8g - Preservatives - Antioxidants.

* Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

NUTRIENT INTOLERANCE

RECOMMENDED FOR ADULT SMALL BREED DOGS (≤10KG) FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial
 - long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Inflammatory Bowel Disease (IBD)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Growth, gestation/lactation

ALLERGEN RESTRICTION & OLIGOPEPTIDES

Extensively hydrolysed protein, composed of oligopeptides and pure amino acids from a single source helps minimise the risk of nutrient intolerances. A manufacturing process aimed at minimising sources of contamination.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

SPECIFICALLY FORMULATED FOR SMALL DOGS

Specially adapted formula to meet the digestive and dental sensitivities of small dogs. The kibble is suitable for their small jaws.

KEY VALUES	Per 1000Kcal	Per 100g as fed

	60	550	463
	70	618	520
	80	683	575

When a food allergy or a food intolerance is suspected, the dog's diet should be changed following classical food transition. Nutritional management with Hypoallergenic Moderate Calorie may be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals.

NUTRIENT INTOLERANCE

RECOMMENDED FOR DOGS WITH TENDENCY TO BE OVERWEIGHT IN CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial
 - long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Acute pancreatitis*
- Gestation/lactation/growth

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

MODERATE CALORIE AND PHOSPHORUS

Moderate calorie content to help maintain ideal weight and moderate phosphorus intake to help support healthy kidney function.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

Magnesium	0.21g	0.08g

CALCULATED METABOLISABLE ENERGY (TOTAL)

Energy_NRC 2006 (CF) [kcal/100g]	372.2
----------------------------------	-------

COMPOSITION

Rice flour, hydrolysed soya protein isolate, rice, animal fats, hydrolysed poultry liver, minerals, beet pulp, soya oil, fish oil, fructo-oligosaccharides, borage oil, marigold meal. Protein sources: hydrolysed soya protein isolate (19.3%), hydrolysed poultry liver (5%). Carbohydrate sources: rice flour (45.0%), rice (8.6%).

ADDITIVES (KG)**

Nutritional additives: Vitamin A: 33000 IU, Vitamin D3: 800 IU, Iron [3b103]: 41mg, Iodine [3b201, 3b202]: 3.7mg, Copper [3b405, 3b406]: 15mg, Manganese [3b502, 3b504]: 54mg, Zinc [3b603, 3b605, 3b606]: 160mg, Selenium [3b801, 3b811, 3b812]: 0.26mg - Technological additives: Clinoptilolite of sedimentary origin: 10g - Preservatives - Antioxidants.

** Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

HYPOALLERGENIC PUPPY

Available in
1.5, 3.5 and
14kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

PUPPY'S AGE (MONTHS)	ADULT WEIGHT				
	5KG	10KG	20KG	30KG	40KG
6 - 7	101-91	187-169	316-294	428-429	531-532
8 - 9	80	152-135	274-251	399-372	499-467
10 - 11	79	134-133	228-225	338-307	435-408
12 - 13	-	-	223	305-304	383-380
14 - 15	-	-	-	303	376

When a food allergy or a food intolerance is suspected, the puppy's diet should be changed following classical transition. Nutritional management with Hypoallergenic Puppy can be continued until the end of the growth period, under veterinary supervision. It is recommended to divide the daily intake into several meals.

NUTRIENT INTOLERANCE

RECOMMENDED FOR PUPPIES OVER 6 MONTHS OF AGE, WITH AN EXPECTED ADULT WEIGHT GREATER THAN 4KG IN CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial
 - management during growth
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Gestation and lactation
- Puppies less than 6 months of age
- Puppies with an expected adult weight <4kg

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

OPTIMAL GROWTH

Specially adapted levels of nutrients (including protein and calcium) to meet the nutritional needs of growing puppies and satisfy their fussy appetites.

KEY VALUES

	Per 1000Kcal	Per 100g as fed

HYPOALLERGENIC PUPPY

HYPOALLERGENIC

SMALL DOGS

S

Available in
1 and 3.5kg bags

RECOMMENDED DAILY INTAKE & FEEDING DURATION

	DOG'S WEIGHT (kg)	BODY CONDITION		
		THIN	NORMAL	OVERWEIGHT
		grams	grams	grams
ADULT DOG	2	54	48	41
	2.5	64	56	49
	3	73	65	56
	3.5	82	72	63
	4	91	80	69
	5	108	95	82
	6	123	109	94
	7	138	122	105
	8	153	135	116
	9	167	147	127
	10	181	159	137

When a food allergy or a food intolerance is suspected, the dog's diet should be changed following classical food transition. Nutritional management with Hypoallergenic Small Dogs may be continued for the dog's lifetime, under veterinary supervision. It is recommended to divide the daily intake into 2 meals.

[S/O INDEX] This diet is formulated to promote a healthy urinary environment.

NUTRIENT INTOLERANCE

RECOMMENDED FOR ADULT SMALL BREED DOGS (< 10KG) IN CASE OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - food elimination trial
 - long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Small intestinal bacterial overgrowth (SIBO)

NOT RECOMMENDED IN CASE OF

- Pancreatitis
- Gestation/lactation/growth

HYDROLYSED PROTEIN

Hydrolysed protein with a low molecular weight for very low allergenicity.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

SPECIFICALLY FORMULATED FOR SMALL DOGS

Specially adapted formula to meet the digestive, dental and urinary sensitivities of small dogs. The kibble is suitable for their small jaws.

KEY VALUES	Per 1000Kcal	Per 100g as fed

----------------------------------	-------

COMPOSITION

Duck by-products, rice, sunflower oil refined, powder cellulose, fish oil, minerals, fructo-oligosaccharides, marigold meal. Protein source: duck [53%]. Carbohydrate source: rice [15%].

ADDITIVES (KG)**

Nutritional additives: Vitamin A: 3360 IU, Vitamin D3: 300 IU, Taurine: 1 g, Iron [3b103]: 11 mg, Iodine [3b202]: 0.99 mg, Copper [3b405, 3b406]: 4.1 mg, Manganese [3b502, 3b503, 3b504]: 14.4 mg, Zinc [3b603, 3b605, 3b606]: 33 mg, Selenium [3b801, 3b811, 3b812]: 0.08 mg - Technological additives: Clinoptilolite of sedimentary origin: 2.5 g.

** Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

NUTRIENT INTOLERANCE

RECOMMENDED FOR CASES OF

- Adverse Food Reactions (AFR) with dermatologic and/or gastrointestinal signs:
 - long term management
- Canine Atopic Dermatitis (CAD) associated with AFR +/- chronic pruritus
- Chronic diarrhoea

NOT RECOMMENDED IN CASE OF

- Acute pancreatitis*

*may be fed in case of chronic pancreatitis

SELECTED PROTEIN

A limited number of protein sources helps limit the risk of nutrient intolerance.

EPA/DHA & SKIN BARRIER

Formulated with fatty acids to help maintain healthy skin and digestion. Formulated to support the skin's natural protective barrier.

DIGESTIVE SECURITY

Formulated with nutrients which support a balanced digestive system.

ROYAL CANIN® RENAL + HYPOALLERGENIC dry is a complete dietetic feed for dogs formulated for the support of renal function in the case of chronic renal insufficiency and for the reduction of ingredient and nutrient intolerance. Restricted level of phosphorus. Hydrolysed protein sources and selected carbohydrate sources.

Renal diets are recommended as soon as creatinine goes out of reference range (from IRS stage 2), before the disease further progresses, and before inappetence develops. When a food allergy or a food intolerance is suspected, the dog's diet should be changed using classical food transition. RENAL + HYPOALLERGENIC diet may be continued for the dog's lifetime.

It is recommended that a veterinarian's opinion be sought before use and before extending the period of use.

It is recommended to divide the daily intake into 2 meals.

Fresh water should be available at all times

RECOMMENDED FOR CASES OF

Renal disease

- Azotaemic Chronic Kidney Disease (IRIS stages 2 to 4)
- Chronic Kidney Disease with proteinuria (IRIS stages 1 to 4)

Dermatological/GI conditions:

- Adverse Food Reactions (AFR)
- Canine Atopic dermatitis
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)

Other:

- Management of recurrence of urolithiasis requiring urine alkalinisation (urate and cystine) in dogs with impaired renal function and/or AFR

NOT RECOMMENDED FOR CASES OF

- Pancreatitis
- Growth, gestation/lactation

RENAL SUPPORT

Formulated with low phosphorus and moderate protein of high quality to support renal function.

ADAPTED ENERGY

Adapted energy content to reduce meal volume and help compensate for a decreased appetite.

HYDROLYSED PROTEIN

Hydrolysed protein with low molecular weight to ensure the food is hypoallergenic.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

KEY VALUES

ROYAL CANIN® URINARY S/O + HYPOALLERGENIC dry is a complete dietetic feed for dogs formulated for the dissolution of struvite stones, the reduction of struvite stone recurrence, and for the reduction of ingredient and nutrient intolerances. Urine undersaturating or metastabilising properties for struvite and/or Urine acidifying properties. Hydrolysed protein sources and selected carbohydrate sources.

RECOMMENDATIONS: It is recommended that advice from a veterinarian be sought before use and before extending the period of use. Feed URINARY S/O + HYPOALLERGENIC dry for 5 to 12 weeks for the dissolution of struvite stones, initially up to 6 months for the reduction of struvite stone recurrence, and 3 to 8 weeks for the reduction of ingredient and nutrient intolerances: if signs of intolerance disappear this feed can be used initially up to one year.

This diet is formulated to promote a healthy urinary environment.

RECOMMENDED FOR CASES OF

Urinary disorders:

- Struvite uroliths: dissolution and management of recurrence
- Calcium oxalate uroliths: management of recurrence

+

Dermatological/GI conditions:

- Adverse Food Reactions (AFR)
- Canine Atopic Dermatitis (CAD)
- Chronic diarrhoea
- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)

NOT RECOMMENDED FOR CASES OF

- Chronic Kidney Disease (CKD)
- Concurrent use of urine-acidifying medications
- Growth, gestation/lactation
- Cardiac disease (when sodium restriction is required) / Heart failure

URINE DILUTION

Urine dilution makes the urine less liable to form crystals.

LOW RSS

A low concentration of ions helps the dissolution and limits the formation of common urinary stones.

HYDROLYSED PROTEIN

Hydrolysed protein with low molecular weight to ensure the food is hypoallergenic.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

	70	541	6 + 1/8	595	6 + 6/8
	80	598	6 + 6/8	658	7 + 3/8

Weight loss: Individual target weight is determined and then feeding amount established. The recommended daily intake is based on the dog's ideal weight. The starting ration may need to be adjusted during follow-up visits, based on each individual's response and the rate of weight loss. An objective of losing 1-3% bodyweight per week is generally achievable over the first 3 months, and of 0.5-2% afterwards. **Maintenance after weight loss:** Energy requirements to maintain stable body weight after weight loss are lower than those of dogs that have never had obesity. Based on current scientific knowledge, our maintenance after weight loss rations are calculated by increasing the weight loss ration by about 10%.

It is recommended to divide the daily intake into at least 2 meals and have fresh water available at all times.

When a food allergy or a food intolerance is suspected, the dog's diet may be changed without any food transition; otherwise a classical transition can be done (over 4-5 days).

ROYAL CANIN® HYPOALLERGENIC + SATIETY dry is a complete dietetic feed for dogs formulated for the reduction of ingredient and nutrient intolerances and for the reduction of excessive body weight. Hydrolysed protein sources and selected carbohydrate sources.

RECOMMENDATIONS: your advice as a veterinarian is necessary before use and before extending the period of use of this diet. For the reduction of ingredient and nutrient intolerances, feed 3 to 8 weeks: if signs of intolerance disappear this feed can be used initially up to one year before recheck. Feed until target body weight is achieved and after if required to maintain target body weight. For an efficient weight loss or ideal weight maintenance, the recommended daily energy intake should not be exceeded. The diet may be continued for the dog's lifetime with vet follow-up.

RECOMMENDED FOR CASES OF

Dermatological/GI conditions:

- Adverse Food Reactions (AFR)
- Canine Atopic Dermatitis (CAD)
- Chronic Enteropathy, including Inflammatory Bowel Disease (IBD)
- GI conditions requiring a high fibre level
- Fibre-responsive colitis/diarrhoea (including stress diarrhoea)

+

Weight management:

- Overweight/obesity: weight loss and maintenance after weight loss
- Stabilised diabetes mellitus with concomitant overweight/obesity
- Hyperlipidaemia with concomitant overweight/obesity

NOT RECOMMENDED FOR CASES OF

- Growth, gestation or lactation
- Conditions where high fibre content is not recommended (eg: chronic constipation, severe arthritis making defecation difficult)

HYDROLYSED PROTEIN

Hydrolysed protein with low molecular weight to ensure the food is hypoallergenic.

SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

EFFECTIVE WEIGHT MANAGEMENT

Provides safe weight loss and helps avoid weight regain. 97% of dogs lost weight in 3 months using this nutritional approach*

BEGGING CONTROL

High level of selected fibres helps to keep dogs satisfied between meals. Nutritional approach shown to help control begging in 83% of dogs during weight loss*

*Flanagan J. et al (2017) Success of a weight loss plan for overweight dogs: The results of an international weight loss study. PLoS ONE 12(9): e0184199.

	80	953 g	839 g	724 g

ROYAL CANIN® GASTROINTESTINAL LOW FAT + HYPOALLERGENIC dry is a complete dietetic feed for dogs, formulated for the support of lipid metabolism in the case of hyperlipidaemia and for the reduction of ingredient and nutrient intolerances. Low level of fat. Hydrolysed protein sources and selected carbohydrate sources.

RECOMMENDATIONS: It is recommended that a veterinarian's opinion be sought before use and before extending the period of use. Feed GASTROINTESTINAL LOW FAT + HYPOALLERGENIC dry for 3 to 8 weeks: if signs of intolerance disappear this feed can be used initially up to one year, and initially up to 2 months for the support of lipid metabolism in the case of hyperlipidaemia

RECOMMENDED FOR CASES OF

- Inflammatory Bowel Disease (IBD)
- Exocrine Pancreatic Insufficiency (EPI)
- Adverse Food Reactions (AFR) with gastrointestinal signs
- Lymphangiectasia, exudative enteropathy
- Protein-losing enteropathy (PLE)
- Acute and chronic pancreatitis
- Hyperlipidaemia

NOT RECOMMENDED FOR CASES OF

- Growth, gestation/lactation

LOW FAT

For the nutritional management of dogs needing a fat-restricted diet.

FIBRE BALANCE

Limited fibre content to allow provision of maintenance energy levels despite fat restriction.

DIGESTIVE SUPPORT

A highly digestible formula with balanced fibres, including prebiotics, to support healthy digestion and transit.

HYDROLYSED PROTEIN

Highly digestible hydrolysed (soy) protein, reducing the risk of food sensitivities that may cause recurrent gastrointestinal signs.

KEY VALUES

	Per 1000Kcal	Per 100g as fed
Moisture	27.08 g	9.5 g
Protein	71.27 g	25 g

Calcium	2.28 g	0.8 g
Phosphorus	1.71 g	0.6 g
Potassium	1.71 g	0.6 g
Sodium	1.14 g	0.4 g
Chloride	2 g	0.7 g
Magnesium	0.23 g	0.08 g
Copper	5.42 mg	1.9 mg
Zinc	48.46 mg	17 mg
Metabolisable energy*		350.8 Kcal

*Calculated according to NRC 2006 CF.

COMPOSITION

Rice flour***, hydrolysed soya protein isolate**, rice***, beet pulp, hydrolysed poultry liver**, animal fats, minerals, psyllium husks and seeds, fish oil, sodium butyrate, soya oil, fructooligosaccharides (0.48%), marigold meal.

Protein sources: 23.3%. *Carbohydrate sources: 51.6%. Highly digestible ingredients: 79.1%.

ADDITIVES (KG)****

Nutritional additives: Vitamin A: 34000 IU, Vitamin D3: 800 IU, Vitamin E: 660 mg, Vitamin C: 260 mg, Taurine: 1.9 g, Iron (3b103): 39 mg, Iodine (3b201, 3b202): 3.5 mg, Copper (3b405, 3b406): 14 mg, Manganese (3b502, 3b504): 51 mg, Zinc (3b603, 3b605, 3b606): 152 mg, Selenium (3b801, 3b811, 3b812): 0.24 mg

Technological additives: Clinoptilolite of sedimentary origin: 10 g - Preservatives - Antioxidants.

**** Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

Treats

COMPATIBLE WITH

HYPOALLERGENIC DIETS

Available in
6 x 230g bags

RECOMMENDED DAILY INTAKE

Treats for dogs over 6 months old.

Please consult your veterinarian if you have any questions.

Dog's weight	<2 kg	2-5 kg	6-10 kg	11-15 kg	16-20 kg	>20 kg
Max pieces per day	2	3	7	10	13	18

Do not feed more than the maximum number of treats per day indicated in the feeding guidelines. If you are giving treats, it is recommended to adjust the main meal portion size accordingly to maintain your pet's healthy body weight.

HYPOALLERGENIC DIETS

TREATS COMPATIBLE WITH HYPOALLERGENIC DIETS

ROYAL CANIN® Treats were developed by experts in canine nutrition to ensure treating does not compromise the health benefits of your dog's diet.

COMPATIBLE ROYAL CANIN® DOG DIETS

- HYPOALLERGENIC
- HYPOALLERGENIC MODERATE CALORIE
- HYPOALLERGENIC PUPPY
- HYPOALLERGENIC SMALL DOG
- SENSITIVITY CONTROL
- SKIN CARE
- SKIN CARE SMALL DOG

WITH HYDROLYSED PROTEIN
AND VITAMIN B12
