NUTRITIONAL SUPPLEMENT

This resource has been produced with the greatest care and incorporates the most up-to-date scientific information and research findings. We recommend that you refer to our packaging as the primary reference for product information as this can change with time. Bearing in mind the diversity and complexity of clinical cases in dogs and cats, it is important to note that the suggestions in this resource for further tests and therapeutic options cannot be exhaustive. Under no circumstances should the treatments and dietary solutions suggested here replace examination by a veterinary surgeon.

The publishers and the authors will accept no responsibility for the failure of any of the treatments or nutritional solutions put forward in this resource. Not for use in Canada and in USA.

While the information is considered to be true and correct at the date of publication (**May 2025**), changes in circumstances after the time of publication may impact on the accuracy of the information. Please refer to the digital copy available online at [vetportal.royalcanin.co.uk](http://vetportal.royalcanin.co.uk) for the most recent product data.

NEUTERED

BALANCE

NEUTERED

SATIETY BALANCE

NEUTERED

SATIETY BALANCE

Available in  
400g, 1.5, 3.5,  
8 and 12kg bags

#### RECOMMENDED DAILY INTAKE & FEEDING DURATION

ADULT CAT	CAT'S WEIGHT (kg)	BODY CONDITION	
		NORMAL	OVERWEIGHT
		grams	grams
	2	38	30
	2.5	45	36
	3	51	41
	3.5	57	45
	4	62	50
	4.5	68	54
	5	73	58
	5.5	78	63
	6	83	67
	6.5	88	70
	7	93	74
	7.5	98	78
	8	102	82
	8.5	107	85
	9	111	89
	9.5	115	92
	10	120	96

Neutering may lead to changes in energy needs and appetite regulation which can increase the risk of weight gain. Regular weighing and body condition scoring is highly recommended to help neutered cats maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

**[S/O INDEX]** This diet is formulated to promote a healthy urinary environment.

OPTIMAL WEIGHT

#### RECOMMENDED FOR

- Neutered cats (from neutering<sup>1</sup> to 7 years of age)

#### NOT RECOMMENDED IN CASES OF

- Gestation/lactation

<sup>1</sup> Based on neutering at 6 months.

#### HIGH FIBRE

This formula helps to reduce spontaneous energy intake, thanks to appetite regulating fibres.

#### OPTIMAL BODYWEIGHT

Moderate fat and calorie levels help cats to maintain ideal bodyweight. The adapted protein level helps support muscle mass.

#### URINARY HEALTH

Supports a healthy urinary tract thanks to an adapted mineral balance.

	9	113	94	75
	9.5	118	98	78
	10	122	102	81

Regular weighing and body condition scoring is highly recommended to help cats maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

**[S/O INDEX]** This diet is formulated to promote a healthy urinary environment.

## OPTIMAL WEIGHT

### RECOMMENDED FOR

- Entire adult cats (from 12 months to 7 years of age)
- NOT RECOMMENDED IN CASES OF**
- Growth, gestation/lactation

### ENERGY BALANCE

Formula specifically designed to meet the energy and nutrient needs of intact adult cats.

### ANTIOXIDANT COMPLEX

Enriched with a blend of antioxidants to help neutralise free radicals.

### URINARY HEALTH

Supports a healthy urinary tract thanks to an adapted mineral balance.

	10	128	107	86

ROYAL CANIN® DENTAL feline diet has been awarded the Veterinary Oral Health Council (VOHC) seal "helps control plaque" as the diet has been clinically proven to efficiently reduce plaque build-up. For full efficacy it is recommended to avoid soaking the kibbles.

**[S/O INDEX]** This diet is formulated to promote a healthy urinary environment.

# ORAL HYGIENE

## RECOMMENDED FOR

- Daily oral hygiene
- Helping to delay the development of dental plaque and tartar
- Halitosis associated with dental plaque and tartar

## NOT RECOMMENDED IN CASES OF

- Chronic kidney disease (CKD)
- Cardiac disease<sup>1</sup>
- Growth, gestation/lactation

<sup>1</sup> Where sodium restriction is required.

## PLAQUE CONTROL

Clinically proven to efficiently reduce plaque build-up.

## BRUSHING EFFECT

The shape and size of the kibble support prehension and tooth penetration into the food. This helps to reduce plaque accumulation and tartar build-up.

## HAIRBALL COMPLEX

A specific blend of fibres, including psyllium, helps control hairball formation by eliminating ingested hair through the stools.

Helps control plaque.

	9	120	101	80
	9.5	125	104	83
	10	130	108	87

This diet can be fed long term if required. In case of anticipated social and/or environmental changes the cat should ideally be fed the diet for at least two weeks before.

**[S/O INDEX]** This diet is formulated to promote a healthy urinary environment.

# PERIOD OF ADAPTATION

## RECOMMENDED FOR

- Support for cats during difficult situations
- Support for cats with stress-related digestive, skin and urinary signs

## NOT RECOMMENDED IN CASES OF

- Growth, gestation/lactation

## CALMING SUPPORT

Contains hydrolysed milk protein and L-tryptophan to help support cats prone to behaviour changes in unusual environments and situations.

## HAIRBALL COMPLEX

A specific blend of fibres, including psyllium, helps control hairball formation by eliminating ingested hair through the stools.

## SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

	10	115	92

Regular weighing and body condition scoring is highly recommended to help cats maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

**[S/O INDEX]** This diet is formulated to promote a healthy urinary environment.

## HEALTHY AGEING

### RECOMMENDED FOR

- Mature cats over 7 years of age with a tendency to gain weight (Body Condition Score greater than 5/9) (Ideally after a senior health check)

### NOT RECOMMENDED IN CASES OF

- Growth, gestation/lactation

#### VITALITY COMPLEX

This formula includes a selection of nutrients that help to support vitality.

#### HIGH FIBRE

Contains fibres selected for their satiating effect, that promote the feeling of fullness.

#### ANTIOXIDANT COMPLEX

Enriched with a blend of antioxidants to help neutralise free radicals.

ROYAL CANIN® URINARY S/O + BLADDER COMFORT dry is a complete dietetic feed for cats formulated for the dissolution of struvite stones and the reduction of struvite stone recurrence, and for feline lower urinary tract disease. Urine undersaturating or metastabilising properties for struvite and/or urine acidifying properties.

**RECOMMENDATIONS:** It is recommended that a veterinarian's opinion be sought before use and before extending the period of use. Feed URINARY S/O + BLADDER COMFORT for 5 to 12 weeks for the dissolution of struvite stones and up to 6 months for the reduction of struvite stone recurrence. Water should be available at all times.

**NOTE:** In older cats renal function should be checked before recommending a Urinary S/O diet. The use of Urinary S/O Ageing<sup>7+</sup> + Bladder Comfort is recommended in older cats.

**[S/O INDEX]** This diet is formulated to promote a healthy urinary environment.

### RECOMMENDED FOR CASES OF

- Management of risk factors for Feline Lower Urinary Tract Disease (FLUTD): tendency to be overweight, insufficient water intake and exposure to increased environmental challenges
- Feline Idiopathic Cystitis (FIC)
- Struvite uroliths: dissolution and management of recurrence
- Calcium oxalate uroliths: management of recurrence
- Stress related urinary conditions

### NOT RECOMMENDED FOR CASES OF

- Chronic Kidney Disease (CKD)
- Heart disease (when sodium restriction is required)
- Concurrent use of urine-acidifying medications
- Growth, gestation/lactation

### STRUVITE DISSOLUTION

Helps dissolve struvite stones.

### HYDRATION SUPPORT

This diet encourages cats' natural drinking behaviour, promoting urine dilution thus limiting urine saturation.

### MODERATE CALORIE

A diet with moderate calorie content supports healthy weight maintenance which can help reduce the risk of feline lower urinary tract disease (FLUTD).

### BLADDER COMFORT

This diet contains a combination of nutrients to address the leading risk factors of feline lower urinary tract disease including feline idiopathic cystitis (FIC).

### KEY VALUES

	9.5	86	6/8	91	1 + 1/8
	10	89	7/8	95	1 + 1/8

Weight loss: Individual target weight is determined and then feeding amount established. The recommended daily intake is based on the cat's ideal weight. The starting ration may need to be adjusted during follow-up visits, based on each individual's response and the rate of weight loss. An objective of losing 0.5-2 % bodyweight per week is generally achievable over the first 3 months, and of 0.5-1 % afterwards. Maintenance after weight loss: Energy requirements to maintain stable body weight after weight loss are lower than those of cats that have never had obesity. Based on current scientific knowledge, our maintenance after weight loss rations are calculated by increasing the weight loss ration by about 10%.

It is recommended to divide the daily intake into several meals and have fresh water available at all times. ROYAL CANIN® URINARY S/O + BLADDER COMFORT + SATIETY dry is a complete dietetic feed for cats formulated for the dissolution of struvite stones, the reduction of struvite stone recurrence, for feline lower urinary tract disease and for the reduction of excessive body weight. Urine undersaturating or metastabilising properties for struvite and/or urine acidifying properties.

RECOMMENDATIONS: your advice as a veterinarian is necessary before use and before extending the period of use of this diet. Feed this diet for 5 to 12 weeks for the dissolution of struvite stones and initially up to 6 months before recheck for the reduction of struvite stone recurrence. Feed until the target body weight is achieved and after if required to maintain target body weight.

For cats, a transition period when starting the diet is advised.

For an efficient weight loss or ideal weight maintenance, the recommended daily energy intake should not be exceeded. The diet may be continued for the cat's lifetime with vet follow-up.

### RECOMMENDED FOR CASES OF

#### Urinary disorders:

- Feline Idiopathic Cystitis (FIC)
- Struvite uroliths and urethral plugs: dissolution and management of recurrence
- Calcium oxalate uroliths: management of recurrence
- Stress or anxiety-related urinary conditions
- Management of risk factors for Feline Lower Urinary Tract Disease (FLUTD) : overweight, insufficient water intake and exposure to increased environmental challenges

#### + Weight management:

- Overweight/obesity: weight loss and maintenance after weight loss
- Stabilised diabetes mellitus with concomitant overweight/obesity
- Hyperlipidaemia with concomitant overweight/obesity

### NOT RECOMMENDED FOR CASES OF

- Growth, gestation or lactation
- Azotaemic Chronic Kidney Disease (IRIS stage 2 to 4)
- Concurrent use of urine-acidifying drugs
- Congestive Heart Failure / Cardiac Disease [when sodium restriction is sought]
- Conditions where high fibre content is not recommended [eg: chronic constipation, severe arthritis making defecation difficult]

#### STRUVITE DISSOLUTION

Helps dissolve struvite stones.

#### HYDRATION SUPPORT

This diet encourages cats' natural drinking behaviour. It promotes urine dilution thus limiting urine saturation.

#### BLADDER COMFORT

This diet contains a combination of nutrients to address the leading risk factors of FLUTD including FIC.

#### WEIGHT MANAGEMENT

Formulated to support safe weight loss, control begging and help limit weight regain.

This diet is formulated to promote a healthy urinary environment.

ROYAL CANIN® URINARY S/O AGEING<sup>7+</sup> + BLADDER COMFORT dry is a complete dietetic feed for cats formulated for the dissolution of struvite stones and the reduction of struvite stone recurrence, and for feline lower urinary tract disease. Urine undersaturating or metastabilising properties for struvite and/or urine acidifying properties.

RECOMMENDATIONS: it is recommended that a veterinarian's opinion be sought before use and before extending the period of use. Feed URINARY S/O AGEING<sup>7+</sup> + BLADDER COMFORT for 5 to 12 weeks for the dissolution of struvite stones and up to 6 months for the reduction of struvite stone recurrence. Water should be available at all times.

This diet is formulated to promote a healthy urinary environment.

### RECOMMENDED FOR AGEING CATS (> 7 YEARS OLD) IN CASE OF

- Management of risk factors for Feline Lower Urinary Tract Disease (FLUTD): tendency to be overweight, insufficient water intake and exposure to increased environmental challenges
  - Feline Idiopathic Cystitis (FIC)
  - Struvite uroliths: dissolution and management of recurrence
  - Calcium oxalate uroliths: management of recurrence
  - Stress related urinary conditions
- NOT RECOMMENDED FOR CASES OF**
- Chronic Kidney Disease (CKD)
  - Late stage heart disease and/or congestive heart failure
  - Concurrent use of urine-acidifying medications
  - Growth, gestation/lactation

#### STRUVITE DISSOLUTION

Helps dissolve struvite stones.

#### HYDRATION SUPPORT

This diet encourages cats' natural drinking behaviour, promoting urine dilution thus limiting urine saturation.

#### HEALTHY AGEING

Formulated with an exclusive blend of nutrients to support cats throughout the ageing process and help maintain renal and heart health.

#### BLADDER COMFORT

This diet contains a combination of nutrients to address the leading risk factors of feline lower urinary tract disease including feline idiopathic cystitis (FIC).

### KEY VALUES

## PUPPY FEEDING GUIDE

ADULT TARGET WEIGHT (kg)	AGE OF PUPPY IN MONTHS				
	6	7	8	9	10
2	59	49	49	48	48
4	104	93	82	82	81
6	154	139	125	111	110
8	192	174	156	138	137
10	228	206	185	165	164

Neutering may lead to changes in energy needs and appetite regulation which can increase the risk of weight gain. Regular weighing and body condition scoring is highly recommended to help neutered dogs maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

## OPTIMAL WEIGHT

### RECOMMENDED FOR

- Adult small breed dogs (<10kg) after neutering to 8 years of age<sup>1</sup>

### NOT RECOMMENDED IN CASES OF

- Gestation/lactation

<sup>1</sup> Based on neutering at 6 months.

### IDEAL BODYWEIGHT

Adapted formula and calorie level to help dogs maintain an ideal bodyweight. A blend of fibres help to promote the feeling of fullness.

### DIGESTIVE HEALTH

A highly digestible formula with prebiotics to support healthy digestion.

### DENTAL HEALTH

The mechanical actions of the kibble, coupled with the inclusion of a calcium binder help delay tartar build-up.

KEY VALUES	Per 1000Kcal	Per 100g as fed

10	190	237	281
11	188	234	279
12	187	233	277

Regular weighing is highly recommended throughout growth to help neutered puppies maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

## OPTIMAL WEIGHT

### RECOMMENDED FOR

- Neutered medium breed puppies (adult weight: 11 to 25kg), from neutering up to 12 months old<sup>1</sup>

### NOT RECOMMENDED IN CASES OF

- Gestation/lactation

<sup>1</sup> Based on neutering at 6 months.

### OPTIMAL GROWTH

Formulated to support the growth of puppies, thanks to an adapted energy content, and balanced intake of protein and minerals.

### IDEAL BODYWEIGHT

A moderate calorie and fat formula, and a balance of appetite-supporting fibres, help puppies maintain optimal bodyweight during growth.

### NATURAL DEFENCE SUPPORT

A complex of antioxidants (including vitamin E) and prebiotics to help support natural defences during growth.

14-16	562 - 559	634 - 630	738 - 699

Regular weighing is highly recommended throughout growth to help neutered puppies maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

## OPTIMAL WEIGHT

### RECOMMENDED FOR

- Neutered large breed puppies (adult bodyweight >25kg), from neutering up to 15 months of age<sup>1</sup>

### NOT RECOMMENDED IN CASES OF

- Gestation/lactation

<sup>1</sup> Based on neutering at 6 months.

### OPTIMAL GROWTH

Formulated to support the growth of puppies, thanks to an adapted energy content, and balanced intake of protein and minerals.

### NATURAL DEFENCE SUPPORT

A complex of antioxidants (including vitamin E) and prebiotics to help support natural defences during growth.

### BONE & JOINT SUPPORT

Formulated to help maintain healthy bones and joints.

	85	807	679
	90	842	709
	95	877	738
	100	911	767

Neutering may lead to changes in energy needs and appetite regulation which can increase the risk of weight gain. Regular weighing and body condition scoring is highly recommended to help neutered dogs maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

## OPTIMAL WEIGHT

### RECOMMENDED FOR

- Neutered adult large breed dogs (>25kg) from 15 months to 5 years of age

### NOT RECOMMENDED IN CASES OF

- Growth, gestation/lactation

### IDEAL BODYWEIGHT

Adapted formula and calorie level to help dogs maintain an ideal bodyweight. Designed to help promote the feeling of fullness, with a blend of fibres.

### DIGESTIVE HEALTH

A highly digestible formula with prebiotics to support healthy digestion.

### BONE & JOINT SUPPORT

Formulated to help maintain healthy bones and joints.

Neutering may lead to changes in energy needs and appetite regulation which can increase the risk of weight gain. Regular weighing and body condition scoring is highly recommended to help neutered dogs maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

### COMPOSITION

Pork by-products, poultry by-products, rice flour, powdercellulose, pork blood products, vital wheat gluten, corn starch mixture, sunflower oil refined, minerals, fish oil, marigold meal.

### ADDITIVES (KG)\*

Nutritional additives: Vitamin D3: 290 IU, Iron [3b103]: 10mg, Iodine [3b202]: 0.24mg, Copper [3b405, 3b406]: 1.9mg, Manganese [3b502, 3b503, 3b504]: 3mg, Zinc [3b603, 3b605, 3b606]: 30mg - Technological additives: Clinoptilolite of sedimentary origin: 2g.

\* Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

NEUTERED ADULT

# DENTAL

## SMALL DOGS

Available in  
1.5 and 3.5kg bag

### RECOMMENDED DAILY INTAKE & FEEDING DURATION

	DOG'S WEIGHT (kg)	BODY CONDITION		
		THIN	NORMAL	OVERWEIGHT
		grams	grams	grams
ADULT DOG	2	55	49	42
	3	75	66	57
	4	93	82	70
	5	110	96	83
	6	126	111	96
	7	141	124	107
	8	156	137	119
	9	170	150	129
	10	184	162	140

VOHC award  
ROYAL CANIN® DENTAL SMALL DOGS has been awarded the VOHC seal "helps control tartar" as it has been clinically proven to efficiently reduce tartar build-up.

## ORAL HYGIENE

### RECOMMENDED FOR SMALL BREED DOGS (≤10KG)

- Daily oral hygiene
- Helping to delay the development of dental plaque and tartar
- Halitosis associated with dental plaque and tartar

### NOT RECOMMENDED IN CASES OF

- Chronic kidney disease (CKD)
- Cardiac disease<sup>1</sup>
- Growth, gestation/lactation

<sup>1</sup> Where sodium restriction is required.

### TARTAR CONTROL

Clinically proven to efficiently reduce tartar build-up.

### BRUSHING EFFECT

The shape and size of the kibble support prehension and tooth penetration into the food. This helps to reduce plaque accumulation and tartar build-up.

### URINARY HEALTH

Supports a healthy urinary tract thanks to an adapted mineral balance.

Helps control tartar.

#### RECOMMENDED DAILY INTAKE & FEEDING DURATION

ADULT DOG	DOG'S WEIGHT (kg)	BODY CONDITION		
		THIN	NORMAL	OVERWEIGHT
		grams	grams	grams
	26	365	321	277
	30	406	358	309
	35	456	401	347
	40	504	444	383
	45	551	485	419
	50	596	525	453
	55	640	563	487
	60	683	601	519
	70	767	675	583
	80	848	746	644
	90	926	815	704
	100	1002	882	762

Regular weighing and body condition scoring is highly recommended to help dogs maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

## OPTIMAL WEIGHT

### RECOMMENDED FOR

- Entire adult large breed dogs (>25kg) from 15 months to 5 years of age

### NOT RECOMMENDED IN CASES OF

- Growth, gestation/lactation

### BONE & JOINT SUPPORT

Formulated to help maintain healthy bones and joints.

### DIGESTIVE HEALTH

A highly digestible formula with prebiotics to support healthy digestion.

### ANTIOXIDANT COMPLEX

Enriched with a blend of antioxidants to help neutralise free radicals.

Regular weighing and body condition scoring is highly recommended to help dogs maintain an ideal bodyweight and shape. The food ration should be regularly reviewed and adjusted as necessary.

## OPTIMAL WEIGHT

### RECOMMENDED FOR

- Adult small breed dogs (<10kg) from 10 months of age up to 8 years.
- Adult medium breed dogs (11 to 25kg) from 12 months of age up to 7 years.
- Adult large breed dogs (>25kg) from 15 months of age up to 5 years

### NOT RECOMMENDED IN CASES OF

- Growth, gestation/lactation

### SKIN & COAT

Contains nutrients that support hair growth and coat shine.

### DIGESTIVE HEALTH

A highly digestible formula with prebiotics to support healthy digestion.

### URINARY HEALTH

Supports a healthy urinary tract thanks to an adapted mineral balance.

KEY VALUES	Per 1000Kcal	Per 100g as fed
Moisture	896.70g	79g

	13	224	198	171
	14	237	209	180
	15	250	220	190

The diet can be fed long term if required. In case of anticipated changes in social and/or environmental conditions, the diet transition should occur ideally a minimum of two weeks before the anticipated changes.

**[S/O INDEX]** This diet is formulated to promote a healthy urinary environment.

## PERIOD OF ADAPTATION

## RECOMMENDED FOR DOGS UNDER 15kg

- Support for dogs during difficult situations
- Support for dogs with associated digestive and dermatological signs.

## NOT RECOMMENDED IN CASES OF

- Growth, gestation/lactation

## CALMING SUPPORT

Contains hydrolysed milk protein and L-tryptophan to help support dogs in stressful situations, which may lead to the reduction of associated behaviours.

## DIGESTIVE HEALTH

A highly digestible formula with balanced fibres, including prebiotics, to support a healthy digestion and transit.

## SKIN BARRIER

Formulated to support the skin's natural protective barrier for optimal skin health.

### CALCULATED METABOLISABLE ENERGY (TOTAL)

Energy\_NRC 2006 [CF] (kcal /100 grams) 86.0

### COMPOSITION

Pork by-products, poultry by-products, rice flour, powder cellulose, maize gluten, pork blood products, fish oil, minerals, sunflower oil refined, dried tomato pulp, crude lecithins, marigold meal.

### ADDITIVES (KG)\*

Nutritional additives: Vitamin D3: 150 IU, Iron (3b103): 8 mg, Iodine (3b202): 0.13 mg, Copper (3b405, 3b406): 1 mg, Manganese (3b502, 3b503, 3b504): 2.3 mg, Zinc (3b603, 3b605, 3b606): 23 mg.

\* Values reflect only levels added to the formula, not those naturally occurring in components of the diet.

# PILL ASSIST

SMALL DOG

NOT TO SCALE

Available in  
90g pouch

## RECOMMENDED DAILY INTAKE & FEEDING DURATION

ADULT DOG	DOG'S WEIGHT (kg)	Recommended daily max* number of Pill Assist™ Small Dog
	2	1
	2.5	1
	3	1
	3.5	1
	4	2
	5	2
	6	3
	7	3
	8	4
	9	4
	10	5

\* Maximum quantities for dogs in maintenance. For dogs undergoing weight loss, quantities must be adjusted to remain below 10% of recommended daily calorie intake.

NOTE: It is recommended to adapt main meal quantities according to the number of PILL ASSIST™ given. PILL ASSIST should be kept at room temperature, in a dry place and in its original pack tightly closed. It is not recommended to keep a pack opened for longer than one month. Refrigeration and freezing are not recommended.

\*\* PILL ASSIST was shown to enable a daily pill acceptance in 98% of cases with small dogs, ROYAL CANIN® internal study 2018.

## ENABLE PILL INTAKE

### RECOMMENDED FOR

- Easing medication administration in adult small dogs (less than 10kg)

### NOT RECOMMENDED IN CASES OF

- Adverse Food Reactions (AFR)

### HIGHLY ATTRACTIVE FORMULA

Shown to enable pill acceptance for 98% of cases\*\*.

### ADAPTABLE FORM

Designed to easily mould and shape for pill administration.

### ADAPTED ENERGY CONTENT

Moderate calorie formula.

KEY VALUES	Per 1000Kcal	Per 100g as fed
Protein	40.36g	14.00g
Fat content	37.47g	13.00g

# TRAINING TREATS

## FROM PUPPIES TO SENIOR DOGS

Available in  
8 x 110g bags

## RECOMMENDED DAILY INTAKE

Treats for dogs from 6 months old.

Please consult your veterinarian if you have any questions.

Dog's weight	<2 kg	2-5 kg	6-10 kg	11-15 kg	16-20 kg	>20 kg
Max pieces per day	3	5	12	18	22	31

Do not feed more than the maximum number of treats per day indicated in the feeding guidelines. If you are giving treats, it is recommended to adjust the main meal portion size accordingly to maintain your pet's healthy body weight.

## ROYAL CANIN® TRAINING TREATS

ROYAL CANIN® Treats were developed by experts in canine nutrition to ensure treating does not compromise the health benefits of your dog's diet.

## BENEFITS

These chewable training treats are formulated with DHA and vitamins C and E to help support healthy brain function from puppies to senior dogs with less than 3 calories per piece.

## TASTY CHEWS

Low calorie

DHA + vitamins C & E

## ANALYTICAL CONSTITUENTS

Moisture	18%
Protein	20%
Fat Content	3%
Crude Fibre	3.8%
Crude Ash	4.2%
Metabolisable energy	2895Kcal/kg

## OTHER GUARANTEES

Total DHA (%)	0.12
---------------	------

## CALORIES PER CHEW

2.9Kcal

## COMPOSITION

Rice flour, dehydrated poultry proteins, glycerol, wheat flour, wheat gluten, cellulose powder, hydrolysed animal proteins, minerals, algal oil Schizochytrium sp. (source of DHA).

## ADDITIVES (KG)

Nutritional additives: Vitamin E:500 mg, Vitamin C: 530 mg - Preservatives.

# Energy

NUTRITIONAL SUPPLEMENT

Available in  
50g bags

## RECOMMENDED DAILY INTAKE

Recommended max. quantities/day		
Activity	< 25kg	> 25kg
moderate	1 bag	
intense	2 bags	3 bags

It is recommended that daily ration be carefully monitored to help avoid any risk of excess weight gain which could affect the animal's health.

Always keep fresh water available.

### ANTIOXIDANT COMPLEX

Vitamin E (mg)	1400
Vitamin C (mg)	1600
Polyphenols (mg/kg)	150

#### Examples of MODERATE ACTIVITIES

LONG WALK, NO LEAD  
1 - 2h

RUN  
1hr with the owner running

#### Examples of INTENSE ACTIVITIES

RUN  
>1hr with the owner running

RUN  
> 30min with the owner cycling

## ENERGY

The Nutritional Supplement to provide an energy boost to all dogs before and during a moderate or intense physical activity.

### BENEFITS

The Nutritional Supplement Energy contains a high level of short-chain fatty acids which contribute to a rapidly available, high level of energy in order to support the activity and performance of dogs.

Contains reinforced levels of antioxidants (vitamins E & C, polyphenols) which help neutralise free radicals. Exercise stimulates the production of free radicals which are responsible for oxidative stress in cells.

### KEY VALUES

Protein (%)	27
Crude fat (%)	36
Crude fibre (%)	2
Moisture (%)	7
Ash (%)	3.6
NFE (%)	24.4
Vitamin A [IU/kg]	28000
Vitamin B1 (Thiamin) [mg/kg]	24.2
Vitamin B2 (Riboflavin) [mg/kg]	87.1
